Creating an expense report and importing card charges

Click the **Create New Report** button and fill in your expense report header. The ChartField values you enter here will apply to your report, although you can modify the allocations on individual expense lines at any time.

If you have T&E Card charges to import, you can select your card charges from your list of Available Expenses and move them into your expense report.

- Click **Edit** and select an appropriate **Expense Type** for each transaction and **complete any required fields**.
- Use the **Upload Receipt Image** button  to add receipts to transactions of \$50 or more.

Important: University credit card transactions may take 4-5 business days from the time of purchase to appear in your Concur profile. You should never manually enter a Travel and Expense Card transaction from scratch—this may result in an erroneous reimbursement to you.

Adding out-of-pocket expenses

Your out-of-pocket expenses can be added to the same expense report as your Travel and Expense Card transactions.

- Click **Add Expense** and select the **expense** type for the out of pocket expense.
- Complete any required fields.
- Use the **Attach Receipt** button to add receipts to transactions of \$50 or more.

Allocations and splitting charges

- The transactions on your expense report will be allocated to the chartstring in your **report header** by default.
- To change the chartstring on a particular expense line, select the expense (or multiple expenses) and click the **Allocate** button.
